

Training

Sharing our skills for your satisfaction

You need a specific or one-time training? Contact us and we will organise together your personalised session at the LOHR Service training center or on site. Registered training entity.

Goal

- Guarantee the client the same assistance wherever the technical location by training service points and LOHR service partners,
- Improve your technical teams product knowledge,
- Optimise maintenance costs and operational availability of vehicles,
- Generate improved residual values,
- Validate required competences to act on warranty on our products.

Target audience

- Every member of technical team wishing to acquire update or upgrade competences on LOHR car carriers maintenance or repairs.

General content

- 1 to 3 days modules on LOHR Service workshops or on your premises,
- Theoretical and practical days in alternance,
- Measuring and validation of acquired skills,
- Possibility of multilingual training (French, English, German and Spanish).

Various modules

Their content is constantly updated according to LOHR product evolutions. We offer an initial 2-day training course including Car-carrier maintenance, electrical, hydraulic and pneumatic:

- We also offer tailor-made modules according to the customer's needs.
